### **DETAILED ACTION**

This action is in response to the amendment filed August 30, 2007. Claims 1-14 and 16-22 are pending and have been considered below.

#### ***Drawings***

1. The drawings were received on August 30, 2007. These drawings are accepted. All objections to the drawings are withdrawn.

#### ***Specification***

2. Based on the amendment dated August 30, 2007, all objections to the specification are withdrawn.

#### ***Claim Objections***

3. Based on the amendment dated August 30, 2007, all objections to the claims are withdrawn.

#### ***Response to Arguments***

4. Applicant's arguments, see pages 39-44, filed August 30, 2007, with respect to Claims 1, 2, 7, 13, 14, 16 and 19 have been fully considered and are persuasive. The rejection of Claims 1, 2, 7, 13, 14, 16 and 19 has been withdrawn.

***Allowable Subject Matter***

5. Claims 1-14 and 16-22 are allowed.

6. Prior art was found which disclosed image sensing a panoramic object by a remote image sensing device, sending a video signal of a part of the object to an image display portion in a different place, playing back and displaying the received video signal by the image display portion and sending obtained video signal to an image display portion (e.g. Hendricks et al., WO 99/12349). Prior art was also found which disclosed a camera equipped portable terminal image sensing its surroundings and sending the video signal to a image capturing device (e.g. Hanson et al., US 4,786,966).

7. The following is an examiner's statement of reasons for allowance:

8. The prior art of record does not teach or render obvious the limitations as recited in independent claims 1, 2, 7, 13, 14, 16 and 19, specific to obtaining variation information about the surrounding image by a variation detecting portion based on a previous surrounding video signal and a current received video signal. Dependent claims are allowed as they depend from an allowable independent claim.

9. Therefore, the examiner considers obtaining information about the surrounding image by a variation detecting portion of an image capturing device based on a previous surrounding video signal and a current received video signal as the non-obvious novelty of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Meyers whose telephone number is (571) 270-1690. The examiner can normally be reached on Mon-Thurs 8AM-5:30PM.
